

SUPPLIER SOURCE GUIDE

With more audited purchasers of equipment in the chemical industry, *Chemical Processing* is publishing a comprehensive year-end Supplier Source Guide for 2023.

Chemical Processing's Supplier Source Guide will provide 48,000 chemical industry subscribers with a comprehensive, up-to-date "A-Z" Supplier Source Guide Directory and a look back at important trends and topics from the past year.

It will also be made available online to our 50,000 unique visitors to our ChemicalProcessing.com website.

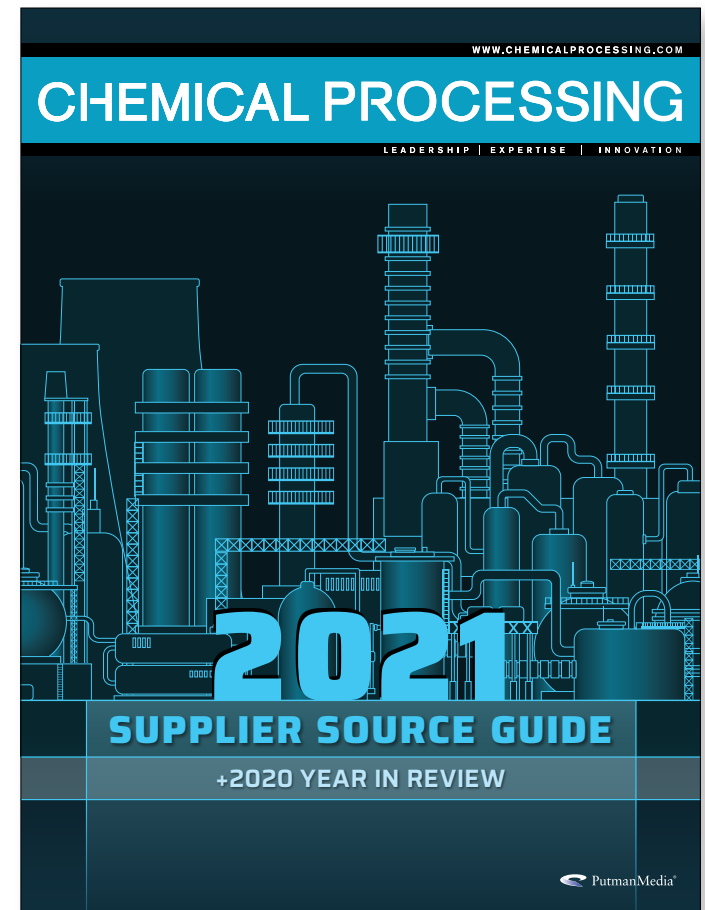

The 2023 Suppliers Source Guide will be published in December 2022 and feature the following advertiser and reader benefits. **In addition, there are still available positions in this year's 2022 Supplier Source Guide, which will be published in December 2021. Space deadline is October 25.**

- The Supplier Source Guide Directory will be featured on ChemicalProcessing.com upon release and will be hosted on our ChemicalProcessing.com website.
- The Supplier Source Guide will be a separate, stand-alone directory, published with a UV varnished cover, on brighter and heavier paper stock and poly-bagged with the December issue.
- The Supplier Source Guide will look back on the year that was the Chemical industry, including *Chemical Processing's* expert monthly coverage of the most important trends and topics that impacted the industry in the past year.
- Bonus distribution at all the major shows *Chemical Processing* exhibits.
- With a Full Page, there are premium positions available across from a product category page, if still available
