

PROCESS AUTOMATION ESSENTIALS

Process Automation Essentials is a series of digital reports by the editors of *Control* designed to provide process industry professionals with an up-to-date, top-level understanding of a range of key process automation topics. Our intent with these interactive PDFs is to present essential engineering and decision-making concepts in a practical, non-commercial fashion together with a review of the latest technology and marketplace drivers—all in a form factor well suited for onscreen consumption.

Why Sponsor an Essentials Report?

- Generate marketing leads
- Build thought leadership
- Exclusive topic ownership
- Minimal execution effort

How Does an Essentials Sponsorship Work for You?

- Select a topic from our established schedule, or propose one of specific interest to your company.
- Once a topic has been agreed upon, our editors will develop a multi-page interactive report complete with your sponsor message
- We promote the report for download via a full range of print and digital media platforms for a three-month period
- Interested process automation professionals register to download the Essentials PDF, and you receive registrant data automatically every week
